GARNER SURPASSES **1 MILLION** HOURS WITHOUT A LOST TIME WORK RELATED INJURY!

Deer Park, TX, August 20, 2007 As of June 14, 2007, Garner Environmental Services surpassed 1,000,000 Man-hours without a Lost Time work related injury.

Garner is an "all hazards emergency" contractor that specialized in Emergency Response for Oil Spills, Haz-mat clean up, Disaster Response and Safety Services such as Training, Stand-by Rescue & Third Party Air Monitoring.

Scotty Bourgeois Vice-President – Safety & Health, reports that for a company of this size, and type of service, this is a monumental accomplishment. This achievement represents **180 weeks (3.5 years)** of routine exposures to numerous hazardous environments, and is remarkable by any standard.

Imagine the daily focus, safety awareness and attentions to detail when responding to environmental events which, by definition, encompasses stressful, physically-demanding, and unfamiliar situations and which are many times in very hazardous conditions.
